Washington, DC 20554

Greetings:

Understanding that the FCC is accepting comments, due Friday, 4-11-25, to identify which FCC rules or portions of rules should be deleted, pertaining to the notice, posted at:

https://docs.fcc.gov/public/attachments/DA-25-219A1.pdf;

Knowing that countless scientific papers have been published, proving that ALL forms of pulsed-mode, radio-frequency, electromagnetic radiation is harmful to every cell of humans, animals, insects, and plants;

Affirming that the ultimate legitimate purpose of government is to protect people and their property against other people;

Recalling that the Declaration of Independence states, in part, that:

> We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed . . .

And pointing out that every one of us, including the person(s) reading this letter, and including the loved ones of every one of the person(s) reading this letter, is already being harmfully impacted by pulsed-mode, radio-frequency, electromagnetic radiation, regardless of whether we can feel it, or not, as a growing number of people who are EMF-sensitive DO feel it, as the cumulative damage to prolonged exposure to this non-ionizing radiation grows;

I wish and require that the following FCC rules be deleted in their entirety:

- Small Cell Order - Accelerating Wireless Broadband Deployment by Removing Barriers to Infrastructure Inv.,33 FCC Rcd. 9088 (2018)
- Moratoria Order - Declaratory Ruling in Accelerating Wireless Broadband Deployment by Removing Barriers to Infrastructure Inv., 33 FCC Rcd. 7705, 7775–91 (2018)
- One-Touch Make Ready Order – Third Report and Order in Accelerating Wireless Broadband Deployment by Removing Barriers to Infrastructure Inv.,33 FCC Rcd. 7705, 7705–91 (2018)
- Middle Class Tax Relief Act, Section 6409 initial rules 2014 - expand perimeter around a tower 6 feet in diameter
- Middle Class Tax Relief Act, Section 6409 expansion 2020 - expand perimeter around a tower 30 feet in diameter
- NEPA 1986 satellite categorical exclusion

Additionally, for the 1996 rule promulgating RF limits, I wish and require that:

The FCC should issue an interpretive rule clarifying that these limits (a) only provide a regulatory safe harbor with respect to Section 704(c)(7) for the siting of wireless facilities and (b) do not provide a safe harbor for, and are not preemptive of, state-based claims regarding, product liability or property rights.

Additionally, I wish and require that:

In **47 C.F.R. Section 1.4000**, also known as the Over-the-Air-Transmitting-Devices (OTARD), delete references to “fixed wireless signals:”

Additionally, I wish and require that:

The FCC comply with the 2021 court remand order by the D.C. Circuit Court of Appeals which requires the FCC to review its RF/microwave radiation exposure limits in light of the 11,000 pages of scientific, peer-reviewed studies showing biological effects within its limits. The Court ordered the FCC to examine the effects of long-term exposure to humans and the environment, particularly to children. FCC must now comply with this court order.

The MAHA Commission Executive Order requires the study of potential contributing causes of childhood chronic disease, including from "electromagnetic radiation." The FCC's actions also need to be consistent with that Executive Order.

Respectfully submitted,

Daniel S. Medbury III,
Retired Electrical Engineer,
Former Nuclear Reactor Operator,
Possessing a background in Radiological Controls and Health Physics, and a **Commercial General Radiotelephone Operator License** (PG-GB-03592) issued by the Federal Communications Commission.
And current citizen of the Commonwealth of Pennsylvania
